

# Our DNS Web Filter

Available for use on both G Suite and Microsoft 365, our DNS web filter enables schools to block games, pornography, streaming services, and other web categories and domains that may undermine a positive learning environment.

## Block or Allow Any Site

Whitelist or blacklist any website, or block groups of domains by category.

## Reports on Browsing Activity

Get custom reports on student browsing at the network level.

## Networkwide Deployment

Customize policies to help protect any device on your school's network.

## Our DNS web filter is an excellent solution for:

- BYOD situations
- iPad / iOS / OSX environments
- 1:1 schools
