

Monitoring G Suite

Our award-winning monitoring service allows you to detect potentially harmful or inappropriate content students may send, receive, or share through their school-issued G Suite accounts. Get insights into student wellness and alerts to risks like cyberbullying, suicidal ideation, online predators, threats of violence, and more.

Advanced AI

Our technology analyzes text (including most deleted text), emojis, images, and videos.

In-Depth Reporting

Use monitoring reports to gain insight into the digital wellbeing of your student body.

Customizable Alerts

Control which issues trigger alerts and who is tasked with managing them.

Help protect your students while they use:

- Gmail
- Google Drive
- Google Docs
- Google Hangouts
- Google Chrome
